Software Development Engineer

As a recent graduate of Software Development Engineering from the Universidad Abierta y a Distancia de México (UnADM), I am eager to contribute my technical skills and passion for innovation to a dynamic team. While I may lack formal professional experience, my academic background and personal projects have equipped me with a strong foundation in tecnologic tools as C++, Java, HTML, PHP, JS, .NET, UML, Linux, MySQL, OSI (Open Sistem Interconnection), WordPress, and mouch more. I am confident in my ability to quickly adapt to new technologies and environments, and I am eager to leverage my knowledge to deliver high-quality solutions that drive business value.

Soft skills

Self-taught, the field of information technology (IT) is the most evolving sector today, it requires constant training.

Tenacious, study and work (my job is operating heavy machinery in construction)

Teamwork, I like to interact with people.

Emotional intelligence, I have been able to lead a family, a job and studies properly managing stress and giving its place to each aspect.

Attention to detail, I like that what I do works as expected or exceeds the expectations of others.

Conflict resolution, I do not consider myself a person of great arguments, I prefer to analyze the situation and thus I can find more than one viable solution.

Creative, example this CV. (*Some people will think of copyright, and maybe they are right, but why invent the wheel...*).

English 80% & US tourist visa (B1/B2)
